

## HOW TO MAKE

# DIY STRING BOWL

**1** Flip the bowl you're using as a mould upside down, and cover in a few layers of cling film to protect it.

**2** Using your brush or spreader, cover the underside of the cling filmed bowl in a few layers of PVA craft glue.

**3** Fill your other pot or bowl with glue, then add in the string. Stir with the brush - make sure it's all covered in glue!

**4** Lay the string over the bowl, adding more glue as you go. Let it set for a day, then peel off from the clingfilmed mould - you're done!

To make this craft, you will need:

- bowl for a mould
- bowl for glue
- clingfilm
- PVA glue
- brush/spreader
- yarn/string
