

## HOW TO MAKE

# PAPER BUTTERFLIES

To make this craft, you will need:

- magazine pages, newspaper, flyers, any paper!
- scissors
- pipe cleaners

You can make these in all different sizes and colours - why not make a garland by stringing them together?

1

Make your paper into a square by folding one corner to the edge and cutting off the edge strip.

2

Starting at a corner of the square, fold the paper accordion-style. Make each fold about a finger wide. Pinch in the middle - these are the top wings!

3

For the bottom wings, make a square from another sheet, & round the corners with scissors. Concertina this one from a flat edge. Pinch in the middle.

4

Place the wings together, and wrap a pipe cleaner around the middle to secure. Spread the wings out and roll the pipe cleaner into antenna!
